

Spain: paper industry

UGT-FICA, FSC-CCOO and ASPAPEL, the Spanish Social Partners in the Pulp, Paper and Cardboard Sector have published a guide of preventive measures to protect the health of workers in relation to COVIDP19 which aims at preventing infection and thus avoiding the spread of the virus while maintaining, as far as possible, the operability in the workplaces.

The prevention measures collected are a compilation not only of the official recommendations but also of measures implemented in the various workplaces in the paper sector, where in a coordinated way between companies and prevention delegates or works committees, a continuous and permanent monitoring of the review of new measures is being carried out to ensure the safety of the staff.

This Guide is a living document, which will be constantly reviewed and updated by of trade unions and employers' organisations, and which serves as a reference for the necessary actions of dissemination to workers and companies.

Social partners call also for a public recognition of the workers of the paper sector, which with their daily commitment ensure the supply of basic goods.
